

TRANSITION écologique

MGM COMMITS

Groupe MGM gathering **MGM Constructeur** and **MGM Hôtels & Résidences** follow the path of sustainable development. The aim is to adopt a more relevant and respectful approach by 2023. **MGM undertakes to work to have more control over its environmental impact.**

This engagement passes through :

Eco-mobility

Make easier ecological means of transport utilization for our collaborators.

Limit travel and encourage car-sharing.

Work on a more responsible and sustainable purchasing policy.

Energies

Buy more renewable energy and, in the long term, work with establishments that produce of renewable energy.

Work towards a more bioclimatic design of buildings, optimizing the use of solar radiation and natural ventilation.

Protect our natural resources by consuming more sensibly.

Gradually reduce the energy consumption of our buildings by 10% each year.

Waste management

Reduce and manage our waste in an efficient way.

Eventually, use 100% eco-labeled, recyclable products that have a low impact on the environment.

Committed to protecting biodiversity.

Awareness-raising

Training our employees to adopt a more environmental-friendly approach.

Encourage our partners to share our commitments and become more sustainably involved.

Working with several local associations and offering eco-responsible activities for our teams and customers.

Spread our commitments by encouraging our partners to respect our sustainable tourism approach.

A commitment to low energy consumption, sustainable tourism and greater biodiversity.
